Qualifications

- Summary
- Experienced in object-oriented programming and design, primarily using Java
 - Understanding of functional programming concepts and applications
 - Knowledge of algorithms and data structures (complexity analysis, etc)
 - Familiar with relational databases and query/model frameworks
 - Experienced with 3D graphics and underlying mathematics
- Technologies
- Java, C#, C++, C, Scala, Javascript, OpenGL
 - MySQL, Microsoft SQL, LINQ, Hibernate ORM
 - L^AT_EX, JSON, XML, XAML
 - Eclipse, Visual Studio, Git, Ant, Maven, Linux
- Education
- University of Wisconsin Oshkosh, June 2016.*
- | | |
|---------------------------------|---|
| B.S. in Computer Science | B.A. in International Studies |
| ○ ABET accredited CS curriculum | ○ Global and National Security emphasis |
| ○ GPA: 3.60 / 4.00 | ○ Sigma Iota Rho (national honor society) |

Experience

- Employment
- Computer Science Tutor**, *University of Wisconsin, Oshkosh, WI.*
- Provided tutoring for introductory and intermediate level Computer Science courses
 - Courses tutored: Intro to Computer Science, Object-Oriented Programming & Design I & II, Architecture & Assembly Language, Data Structures, Discrete Math
- Research Assistant**, *University of Wisconsin, Oshkosh, WI.*
- Developed prototype visualizations using OpenDSA for lambda calculus module of an online programming languages textbook
- Open Source
- OpenMRS**, *Electronic medical records platform.*
- Worked on JIRA bug reports and configuring virtual machines
- Code Maid**, *Visual Studio extension.*
- Improved regular expression used for auto-formatting C# comments
- Military
- Satellite Communications Specialist (31S)**, *United States Army.*
- Operated and maintained satellite communications systems for the Joint Chiefs of Staff contingency terminal
 - Designed and implemented enhanced maintenance procedures in order to ensure mission readiness of aging equipment
 - Honorably discharged
